SUMMARY

Inquisitive and energetic computer science student, skilled with a strong foundation in math, logic, and integration of various systems. Seeking to leverage solid skills in collaboration, communication, and development as a programmer of software and hardware. My prior job skills are not related to my field, and with my work history it shows I haven't had a job for awhile. From that time my interest moved onto more of an educational and technical field in computer science. I have worked on many projects that have helped me develop my skills as a computer scientist in software and hardware engineering.

EXPERIENCE

PHARMACY TECHNICIAN

09/2015 - 05/2016

Learned how to work as a Team with pharmacist and other pharmacy Pharmacy Technician to ensure Patients recieved and was knowledgeable about their medication in a retail setting

- Counted, measured, and compounded medications following standard procedures.
- Located and measured medications according to prescription information, making modifications as instructed by pharmacists and providers
- Communicated with patients to collect information about prescriptions and medical conditions or arrange consultations with pharmacist
